SPECIAL ORCHID PLANT OFFERING

CYMBIDIUM ORCHID PLANTS

are taking the country by storm, due to the great lasting quality of the flowers, and the ease in caring for the plants. These Cymbidiums are all named varieties. Each plant labeled. All of these plants are plant division (not seedlings); consequently the plants are larger and stronger, and are divisions taken from our commercial flower stock. Cymbidiums make excellent home plants. The flowers are in all colors from white to red. Order by color only on this offer—Selection: White, chartreuse, pink, bronze and yellow. Our special offer on blooming size plants for immediate shipment: ONE PLANT, \$10.00 THREE PLANTS, \$25.00 SIX PLANTS, \$45.00

CYPRIPEDIUM ORCHID PLANTS

The beautiful waxy flower with a pouch that has given it the name of "Lady Slipper" Orchid. These lovely ever green plants can be grown outdoors in a warm climate where the temperature does not drop below freezing, or may be grown as house plants. All Cypripediums are named varieties, each plant labeled, and of blooming size. The flowers are many colored: green, yellow, brown, deep tones of red and purple. Order by color only.

ONE PLANT, \$7.50 THREE PLANTS, \$20.00 SIX PLANTS, \$37.50

CYMBIDIUM BACK BULBS

Cymbidium back bulbs are removed from our large plants and are sprouted in our Back Bulb House. A great many of the bulbs on this list are sprouted. We ship sprouted and potted bulbs whenever possible. All bulbs are strong and healthy and should do well if growing instructions are followed. You receive more pleasure from a cymbidium than any other orchid we know.

CYMBIDIUM ORCHID PLANTS

For the amateur as well as the professional, there is no finer flower, lasting for months as a cut flower, and none so easy to grow as the Cymbidium. We have grown these Orchids over a period of years under the following conditions: In Southern California we grow Cymbidiums out of doors under lath or tree shade, however some of our friends grow them under glass, either one just so long as they have a good circulation of air but no direct wind. Cymbidium do well planted in raised beds or grown in pots. Plant high so the base of the pseudo bulbs are at surface level, mulch with leaf mold to keep the compost on the acid side. Cymbidium must have good drainage. We use a potting soil of 2 parts leaf mold, 1 part top soil and 1 part pea gravel or decomposed granite. Use plenty of broken pots or coarse gravel in the bottom of the pot.

We endeavor to keep the following in stock at all times, as we consider these plants essential in every collection. They are all free bloomers and strong growers. These plants are plant divisions from plants that have bloomed and should bloom again in the next blooming season. In some cases there are smaller divisions, consequently we have given you a choice of size of plant and price:--

<u>NAME</u>	<u>FLOWER</u>	<u>Blooming Time</u>	<u>Smaller Blooming Size Plants</u>	<u>Larger Blooming Size</u>
TRACYANUM	Bronze	Dec.-Jan.	10.00	12.50
